**SOLVING the MYSTERY  
of SOCIAL ENCOUNTERS®**

Secret Agent Society (SAS) is a breakthrough social skills approach for 8 to 12-year-old children, with a range of different social and emotional challenges. It is one of the most successful evidence-based programs to date. SAS has fun, espionage-themed resources and program that helps children learn how to feel happier, calmer and braver. It also teaches them how to make friends and keep them. Secret Agent Society is well suited for children who:

- High functioning Autism / Asperger's Syndrome
- Anxiety Disorders
- Attention Deficit Hyperactivity Disorder (ADHD)
- Anger management difficulties
- Other general challenges with friendships, team work, conversations or staying calm

SAS was authored by Clinical Psychologist [Dr Renae Beaumont](#), and is regarded as one of the most successful programs of its kind in the world.
